Part-I Section IV. Terms of Reference (ToR's)

BACKGROUND

Agriculture sector is the mainstay of Pakistan's economy and is an inevitable part to ensure food security in the country. About 64% of the population is engaged in farming directly or indirectly through production, processing and distribution of major agricultural commodities. In order to stabilize the income of farmers in the event of crops failure due to natural calamities, diseases & pest attack, publicly supported safety programs are vital.

Crop insurance is the primary risk management tool that is used to financially support the farmers to compensate and recover from natural disasters. Without effective and affordable crop insurance, catastrophic production losses would sap the rural economy by setting in motion a series of harmful events like farm failures, job losses, farm-related small business failures, financial stress on rural banks and reduced investment in agriculture. As per international experiences, government support to agricultural insurance operations is of paramount importance. Such support can be provided in the form of subsidies on insurance premium to farmers.

Government of the Punjab has roll out a Fasal Bema Scheme better known as Crop Insurance Program for farmer community in case of calamities/disasters. Crop insurance is the primary risk management tool that is used to financially support the farmers to compensate and recover from natural disasters. Without effective and affordable crop insurance, catastrophic production losses would sap the rural economy by setting in motion a series of harmful events like farm failures, job losses, farm-related small business failures, financial stress on rural banks and reduced investment in agriculture.
