## **NOTIFICATION**

### **FINAL ESTIMATE OF COTTON CROP IN THE PUNJAB FOR THE YEAR 2009-10**

#### **AREA :**

According to final estimate of cotton crop kharif, 2009-10, the acreage under the crop is placed at (24.36 lac hectares) 60.19 lac acres (Am = 59.14 , Desi = 1.05 lac acres) as against that of (22.24 lac hectares), 54.95 lac acres (Am= 53.73 , Desi = 1.22 lac acres) sown during last year. The area shows an increase of 9.54 % over the previous year which is due to :-

1. Good economic returns received from the last year produce induced the growers to shift sugarcane area to cotton crop.
2. Less CLCV / insect pest attack on previous year crop also encouraged growers to put more area under cotton crop.
3. Favourable weather conditions at sowing time.

#### **PRODUCTION**

The Production of Cotton crop is estimated to be at 8.552 million bales (85.52 lac bales) during kharif 2009-10 against that of 8.751 million bales ( 87.51 lac bales) produced last kharif, which shows a decrease of 2.27 % over the last year. The production has been reduced due to following:-

- i) Abnormal temperature prevailed during the growth season caused fruit shedding particularly of BT cotton having larger share.
- ii) Severe attack of CLCV and attack of sucking pest / insect in the certain districts of Faisalabad, T.T.Singh, Jhang, Kasur, Okara, Sahiwal, Pakpattan, Multan, Khanewal, Layyah, Bahawalpur, R.Y.Khan & Bahawalnagar.

## NOTIFICATION

### FINAL ESTIMATE OF RICE CROP IN THE PUNJAB FOR THE YEAR, 2009-10

#### AREA

According to final estimate of rice crop during kharif 2009-10, it has been planted on an area of (19.32 lac hectares)47.73 lac acres(Bas=34.94,Irri=5.41 ,Others=7.38) as against ( 19.78 lac hectares)48.87 lac acres(Bas=38.26 Irri=5.0 ,Others= 5.61 ) planted last year. The rice acreage shows a decrease of about 2.3 % over the previous year which is due to :-

- i) Comparatively weak monsoon rains in the rice growing zone.
- ii) Dry, hot season and extensive load shedding of electricity at the time of transplantation also restricted the area.
- iii) Problems faced by the growers in the disposal of their produce.

#### PRODUCTION

According to final estimate of rice crop kharif 2009-10, the production is estimated to be at 37.13 lac tonnes (Bas = 24.76, Irri =5.32 and others = 7.05 ) as compared to 36.43 lac tonnes (Bas = 26.01 , Irri = 5.18 and others = 5.24 ) produced last year. The production thus shows an increase of about 1.9 % over the previous year which is attributed to :-

1. Crop persisted against disease / pest particularly in rice tract area.
2. Availability of fertilizer, weedicide and pesticide remained smooth during growth period.
3. The crop remained logging free.

Comparative better yield of supreme varieties enhanced the production of rice crop inspite of less acreage.

## NOTIFICATION

### FINAL ESTIMATE OF SUGARCANE KHARIF CROP IN THE PUNJAB, 2009-2010

#### AREA

According to final estimate of Sugarcane crop in the Punjab Kharif, 2009-10, the area is placed at about (1.501 million acres) 1501 thousand acres (607.42 thousand hectares) as compared to (1.647 million acres) 1647 thousand acres (666.50 thousand hectares) planted previous year. The area shows a decrease of 8.9 % over the last year which is reported due to the following reasons:-

- i) Maximum area under wheat crop during 2008-09 restricted the sugarcane acreage.
- ii) Shortage of canal water , load shedding of electricity and high rate of inputs also discouraged the grower to put more area under sugarcane crop.

#### PRODUCTION

According to final estimate of Sugarcane Crop 2009-10, the Production is at 31324.00 thousand tonnes as compared to 32294.74 thousand tonnes produced last year. This shows a decrease of about 3.0% over last year which is mainly attributed to corresponding decrease in area. However average yield per acre remained better due to frost free crop and less pest attack.

According to the final estimate of Bajra crop in the Punjab for the year kharif 2009-10, the area is placed at 975500 acres (394763 hectares) as against 955400 acres (386600 hectares) sown last year. The acreage of the crop shows an increase of 2.10 % over the previous year which is due to shifting of area from other competitive kharif crops.

**PRODUCTION:**

The Province of the Punjab is estimated to have produced 244900 tonnes of Bajra as against 247100 tonnes produced last year. The production shows a decrease of 0.89 % over the previous year which is due to lack of less rain at the maturity stages.

## **NOTIFICATION**

### **FINAL ESTIMATE OF MAIZE (AUTUMN) CROP IN THE PUNJAB FOR THE YEAR 2009-10.**

#### **AREA:**

According to final estimate of Maize (Autumn) crop in the Punjab for the year 2009-10, the area is placed at 967.0 thousand acres (391.3 thousand hectares) as compared to 1003.6 thousand acres (406.1 thousand hectares) sown last year. The acreage shows a decrease of 3.65% over the previous year, which is due to

- i) Less economic return received by the growers from last year crop.
- ii) Shifting of area into Cotton Crop.

#### **PRODUCTION:**

The Province of Punjab is estimated to have produced 1743.6 thousand tonnes of Maize crop during 2009-10 as against 1653.8 thousand tonnes produced last year. The production shows an increase of 5.43% over the previous year, which is due to better Average Yield obtained during current year as compared to last year. Hybrid varieties are the major cause for increase in production.
